

# 450 AS-INTERFACE

Life duration  
up to  
50,000  
hours

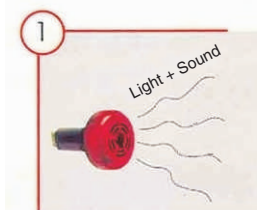

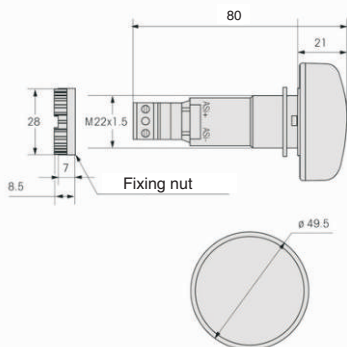

Mixed signal device (behind board) – Ø 22,5 mm.  
LED permanent light – Continuous electronic tone.  
Silence the audible signal by lightly pressing the frontal area.  
Signal transmission via AS-Interface Bus.  
Interior / exterior application (IP 65).

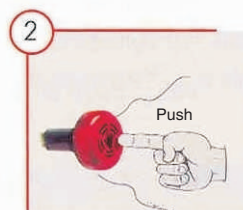

CODE	VOLTAGE V	CONSUMPTION mA	MAX. CONSUMPTION mA	AUDIO FREQUENCY Hz
450 □ 10 55	24 dc	80	< 150	3000

▲ Apply color code **1** **3**

Dimensions (Diameter x Depth): 49,5mm x 80mm  
Construction: Housing: PC - Black ABS structure  
 Dome: Polycarbonate translucent  
Connection: Connector with screw for Ø max. 1,5 mm<sup>2</sup>  
Assembly: Centred for 22,5 mm opening  
Sound output: Frontal

The malfunction of the machine is indicated by means of a signal luminous-acoustics.

The acoustic signal can be disconnected pressing gently the front of device.

The signal of recognition has been sent to the unity of Master control through AS-Interface Bus.

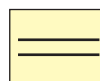

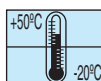

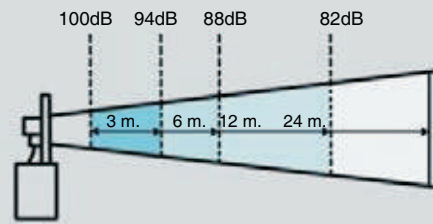

TABLE OF SOUNDS

## Theoretical variation in sound intensity with respect to distance of emitter (dB)

It is important to keep in mind that the sound perception of an Acoustic Signal is reduced by 6 dB at twice the distance.

Example: 100 dB at 3 meters means 94 dB at 6 meters  
94 dB at 6 meters means 88 dB at 12 meters
